Tempe, AZ — +1(480)-791-6573 — [linkedin.com/in/gunakarthik-naidu-lanka](https://www.linkedin.com/in/gunakarthik-naidu-lanka) — gunakarthiknaidu@gmail.com

SUMMARY

Computer Science graduate (GPA 4.0) with experience developing scalable web-based applications and backend services. Strong foundation in full software development lifecycle including requirements analysis, design, implementation, testing, and deployment. Experienced in building REST APIs, integrating databases, and collaborating with cross-functional business and technical teams to deliver reliable solutions.

PROFESSIONAL EXPERIENCE

Software Engineering Intern — Velocity Tech (Zinio TalentHub) Jan 2024 – Dec 2024

- Developed web-based backend services supporting an AI-driven hiring platform.
- Designed and implemented RESTful APIs using Python (FastAPI) and Java for client-facing application features.
- Collaborated with product managers and stakeholders to translate business requirements into technical solutions.
- Designed relational database schemas (PostgreSQL) and implemented query optimization for performance improvements.
- Participated in full SDLC including requirements gathering, development, testing, deployment, and post-release support.
- Assisted in debugging production issues and implementing enhancements based on client feedback.

Full Stack Intern — EPICS (Foster Arizona Platform) Jan 2022 – May 2022

- Built web application features integrating frontend components with backend REST APIs.
- Developed backend services using Python and SQL databases to support community-based workflows.
- Collaborated with business stakeholders during analysis and prototyping phases.
- Deployed containerized applications using Docker in AWS environments.
- Contributed to testing and QA processes to ensure application reliability.

Teaching Assistant — Arizona State University Jan 2023 – Dec 2024

- Guided students in object-oriented programming, web application design, and software engineering principles.
- Assisted in debugging application logic and reinforcing clean coding standards.

PROJECTS

AI Meeting Assistant Web Application

- Built a web-based application integrating OpenAI APIs for automated meeting transcription and summarization.
- Developed backend services handling request routing, data processing, and structured storage.
- Implemented user-facing features with secure API endpoints and database integration.
- Conducted functional testing and performance validation before deployment.

Hospital Database Management System

- Designed and implemented a relational database system supporting healthcare workflows.
- Built backend modules to manage CRUD operations and reporting features.

EDUCATION

Arizona State University	Tempe, AZ
Master of Science in Computer Science	GPA: 4.0/4.0
Bachelor of Science in Computer Science	GPA: 4.0/4.0
Minor in Business	Dec 2024

TECHNICAL SKILLS

Languages: Java, Python, C++, C#, TypeScript
Web Development: REST APIs, Backend Services, Microservices Architecture
Databases: PostgreSQL, MySQL, MongoDB
Cloud DevOps: AWS, Docker, CI/CD, Git
Software Practices: Requirements Analysis, Testing, Debugging, Agile Development
